(Now Cambridgeshire and Peterborough Combined Authority) EU Projects 2014-2020

Summary of project (max 100 words)	Start date	End date	ERDF/ESF investment £	Total project costs £
The project will provide local facilitation resource to assist potential ERDF applicants to develop project ideas, partnerships and compliant bids that have a strategic fit with the Greater Cambridge Greater Peterborough (GCGP) ESIF strategy and are compliant with the national ERDF Operational Programme. Roles to be carried out under this project include publicity; pipeline development; project development; capacity building through a programme of workshops and events; and partnership development.	01/10/2015	31/12/2018	373,677	747,356
The project will provide local facilitation to support the development of a pipeline of ESF provision to meet the skills needs identified through Sector Skills Plans, previous skills analysis work carried out by GCGP and the voluntary, community and social enterprise sector in the GCGP area. The project will also support research to gather intelligence about future labour market requirements to enable ESF to deliver more provision. This work will inform the prioritisation of the remaining uncommitted ESF spend in the GCGP area via Opt-In arrangements operated by the Department for Work and Pensions, the Skills Funding Agency and the Big Lottery Fund as well as currently unallocated funding. Activities to be carried out will include publicity; pipeline development; project development; capacity building through a programme of workshops and events; and partnership development. In delivering these activities, the project will seek to promote the programme and ensure that spend and delivery targets are met while ensuring compliance with EU rules and minimising errors by forming a strong working partnership with the Managing Authority. Our objective is to ensure that ESF operations in the GCGP area are exemplary, delivering high quality, high impact projects that contribute to the aims of the national OP and local strategic economic growth aims.	01-Jan-16	31-Oct-20	115,763	231,531

Cambridgeshire and Peterborough Combined Authority) as a delivery partner (not lead partner)

Summary of project (max 100 words)	Start date	End date	ERDF/ESF investment €	Total project costs €
Nine European institutions collaborate in the framework of the Interreg Europe Program for the implementation of HIGHER. The project has the objective to improve the innovation framework and the smart specialization strategy of different EU regions. HIGHER will analyze and exchange experiences and good practices on the management and implementation of regional policy instruments designed to promote the innovation projects under the collaboration between research centers, industry and public authorities.	01/04/2016	30/09/2020	140,165	164,900

<p>The manufacturing industry is very important for the North Sea Region economy and remains a driver for growth. The focus of the GrowIn 4.0 project will be the common challenges manufacturing SMEs throughout the NSR face today, and the opportunities they bring. Many of these SMEs are moving toward the fourth industrial revolution - Industry 4.0 - which is regarded as the industry of tomorrow.</p> <p>If the manufacturing industry in the NSR is to remain competitive, we need to capture the potential for productivity and growth that Industry 4.0 appears to offer. There is a profound need for an experience based and smart gathering of efficient methods, tools and knowledge to guide SMEs in their transformation towards Industry 4.0.</p> <p>GrowIn 4.0 aims to build strong competences and tools in the participating regions for the benefit of manufacturing SMEs. The approach is to establish a strong partnership which pools knowledge on the manufacturing industry and Industry 4.0. Main challenges and solutions in regards of implementing Industry 4.0 will be investigated.</p> <p>The resulting collections of new or improved methods and tools - developed in interaction with SMEs - will be universal within different areas of the NSR.</p>	01-Aug-17	31-Jul-20	111,050	221,100
