Dear [REDACTED]

**Re: Freedom of Information request ref CA340**

Thank you for your request for information received on 20<sup>th</sup> August 2024. The response is given below:

**Request**

I am requesting information about the bus fleet across the mayoral authority in relation to climate action for the Council Climate Action Scorecards.

I define the bus fleet as buses owned by the combined/mayoral authority or relevant transport body and those owned by private operators.

In particular, please supply me with information relating to the following questions:

a) What is the percentage of the bus fleet across the mayoral authority that is zero emission? Please could the total percentage be given as well as the percentage of the bus fleet that are hydrogen buses and battery electric buses.

b) What is the total number of zero emission buses within the mayoral authority? Please could the number be given for hydrogen buses and battery electric buses.

c) What is the total number of buses in the bus fleet?

I define zero emission buses as buses that are run on hydrogen or battery electric. We do not include hybrid buses or biodiesel buses as zero emission.

## Response

The table outlines the mixture of fleet operated by the majority of the bus operators in the region.
